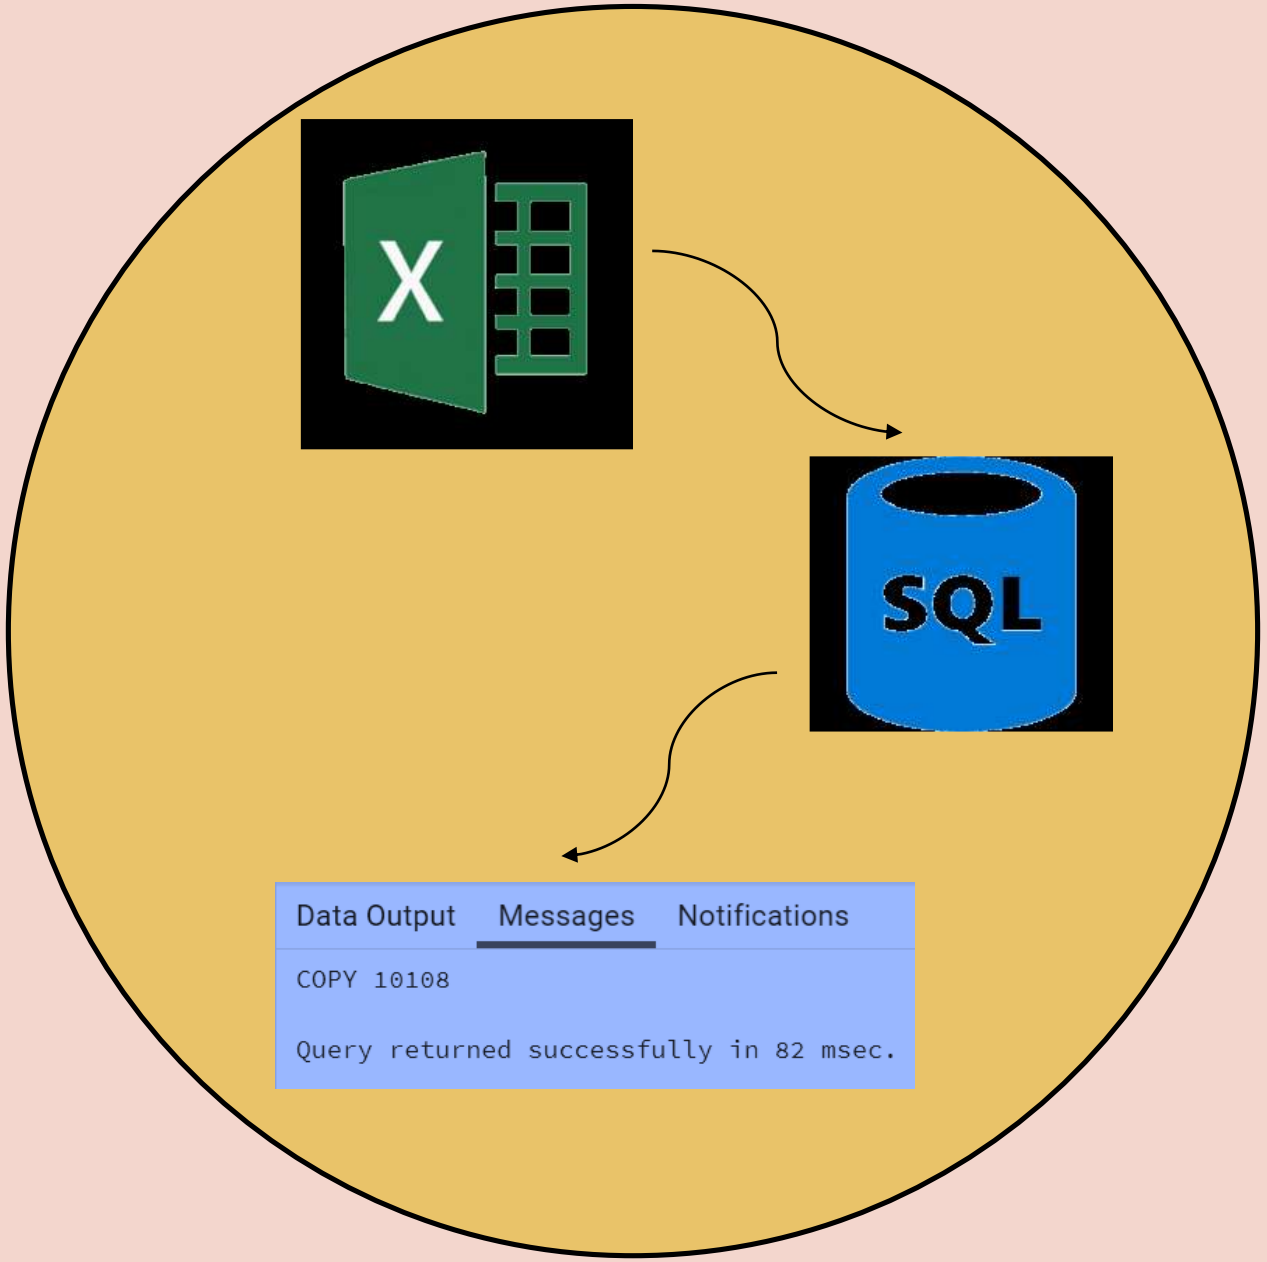
PROJECT OVERVIEW :

- In today's digital economy, credit card transactions generate massive volumes of **real-time financial data**.
- Transforming this raw data into meaningful insights is critical for financial institutions to enhance decision-making, manage risk, and improve customer experience.
- This project focuses on developing an interactive ***Credit Card Transaction Analysis Dashboard using Microsoft Power BI***, aimed at uncovering spending patterns, revenue trends and customer behavior.

DATA EXTRACTION:

- Firstly, collected the dataset from Kaggle in **csv** form.
- Created columns in SQL in order to accommodate the data.
- Imported the csv file into SQL.



DATA PROCESSING AND DAX QUERIES:

- Using **Power Query**,

✓ Handled Missing Values (Replaced missing categories with “Unknown”)

✓ Data Type Transformation

✓ Removing Duplicates

- Using **DAX queries**,

✓Created new columns like Revenue (by adding all the income streams) and Income slabs (High, med, low) and Age groups (20-30, 30-40,…)

INSIGHTS WITH CREDIT CARD TRANSACTIONS:

With respect to Card-type, Age --->

- **Blue cards dominate the portfolio**, contributing **~83% of total revenue**.
- **Swipe transactions dominate usage** (~63% of revenue).
- **Middle-aged customers (40–50)** generate the most spending

With respect to Utility and Education -->

- **Bills are the largest spending category**, meaning cards are heavily used for **utility payments**.
- Highly educated groups (Post-graduate & Doctorate) contribute **much less**, possibly due to smaller population segments.

INSIGHTS WITH CREDIT CUSTOMERS:

CSS(CUSTOMER SATISFACTION SCORE):

The portfolio generates **strong revenue**, but the **customer satisfaction score is moderate**, indicating room for improvement in customer experience.

SPENDING:

✓ **Middle-aged customers** (40–50) are the most valuable segment.
✓ Married customers spend **more** than single customers.
✓ **Business professionals** contribute the highest income levels.

INTEREST EARNING:

- Interest earnings increase from age **30 to 50.**
- Peak earnings occur between ages **45–50.**
- After age 55, interest contribution gradually **declines.**

BUSINESS SUGGESTIONS:

- Promoting **Gold and Platinum cards** to increase premium segment revenue.
- Encouraging **online payments** with cashback or reward programs.
- Could Launch **youth-focused credit cards** to increase usage in the **20–30 segment**.
- Offering **travel rewards** to boost travel category spending.
- Target **business professionals and graduates** with tailored credit card offers.
- **Improving customer satisfaction** through better rewards, services, and support.
